

# What is Ice Wand™?

The Ice Wand™ controls the growth of biofilm (slime) in commercial ice machines. The patented media contained in the Ice Wand™ contains natural antimicrobial properties, and thus are effective slime and mold inhibitors. By significantly reducing and controlling the level of bacteria growth and slime build up, Ice Wand dramatically minimizes the usually complex, labor intensive, and time consuming, maintenance requirements of ice machines, thus allowing the ice machine operators to focus on serving their customers rather than ice machine maintenance and compliance.

## Why Choose Ice Wand?

No one likes to clean, especially something that's as difficult to clean as an ice machine. Ice Wand dramatically minimizes the need for these cleanings. The need for a frequent and deep, thorough cleaning are greatly reduced. **GUARANTEED!**

Apyron's Ice Wand™ contains an advanced anti-microbial media known as MB2050™, which was custom-designed to inhibit the growth of a wide variety of bacteria, algae and slime found in ice machines. The technology, utilizing the known antimicrobial properties of various minerals, is incorporated into a drop-in device, which is placed

directly into ice machine's water sump, providing treatment of the machine in one easy

step. As the water circulates inside the ice machine, the anti-

microbial media continuously fights against bacteria growth. This means your ice machine, with Ice Wand, will begin to fight off bacteria before it forms keeping your ice machine free of slime and mold.

Reduced cleaning means you can redirect your efforts to where they are needed most!

Mold buildup around the water distribution system inside ice machine

### Q. How is the Ice Wand™ installed?

Simply place it in the reservoir or sump tray of a commercial ice machine. The Ice Wand™ is attached with a cable tie (included) so as not to interfere with the float valve in the sump mechanism or other internal working parts. It is an easy, 5-minute job!

### Q. How often do you replace it?

Every three months for ice machines up to 1,200 lbs. daily capacity.

### Q. How do you dispose of it?

The Ice Wand™ is environmentally safe and can be thrown away in regular trash.

Without Ice Wand

With Ice Wand

The results are dramatic. The Installation is simple. The upkeep is easy. There are many great reasons to choose Ice Wand; find your reason today!
